

# TINNITUS Therapy

Through neuroplastic programming

<https://www.facebook.com/Tinnitus-Therapien-106660507416579/>

## Neuroplastic Programming

### Brief description:

In internal and external therapy, stimuli are set that increase the activity in the client's brain (hearing, sight and touch center, etc.). By hearing certain frequencies, an attempt is made to weaken the tinnitus frequencies (phantom sound) or to transform them into another area.
